SPECIAL TOOLS

Light Staplers:

F1A/F1B-Line for fine wire staples up to 16 or 25 mm

The F1A/F1B fine wire staplers are light, powerful, versatile and long lasting tools with sturdy components. These are strengths common to all FASCO fine wire staplers.

The F1A/F1B stapler series is especially suited for light applications like upholstering furniture, shoe manufacture or assembling the interior of cars.

For the most popular staple series there are, in addition to the standard versions, also automatic versions available, as well as double length magazine and long nose models.

WORLD-WIDE PATENTED: ONE TRIGGER SYSTEM

The new automatic design features a rapid valve controlled uniquely by the trigger itself. If the trigger is slightly depressed, the tool works in single shot mode. By depressing the trigger fully, the tool switches over to the automatic firing sequence.

Intermediate Staplers:

F2B/F21P/F21T/F26AT-Line for fine and medium wire staples up to 25 or 40 mm

The F2B/F21P/F21T/F26AT medium wire staplers are compact and lightweight tools which are very easy to handle. They are engineered by FASCO to be tough and durable.

The F2B/F21P/F21T/F26AT stapler series especially excels at exterior and interior applications.

WORLD-WIDE PATENTED: SEQUENTIAL FIRE / BUMP FIRE DEVICE

To ensure an easy and absolutely secure handling for our customers, the FASCO engineers developed the safest full sequential fire / bump fire (single shot / contact trip) actuation in the industry.

Medium Duty Staplers:

F3C-Line for medium and heavy duty staples up to 40 mm

The F3C medium wire staplers are made to last and designed for high resistance. FASCO's medium duty staplers are sturdy with very powerful driving force.

The F3C stapler series is especially suited for applications in the field of millwork, windows and doors or cabinetry.

The 25 mm long nose of the F3C-Line provides for an excellent visibility of the workpiece.

Heavy Duty Staplers:

F3C-Line for wide crown staples

F44C-Line for heavy duty staples up to 50 mm

F45C-Line for heavy duty staples up to 55 mm

The F3C wide crown and F44C/F45C heavy duty staplers are light yet powerful tools.

The F3C wide crown and F44C/F45C stapler series can be used for more challenging applications like in the field of construction, rugged furniture or packaging. There is also a special model available for roofing applications.

FASCO's heavy duty staplers are fitted with an adjustable safety yoke, the patented Contact Trip/Single Shot actuation and can be loaded from the top.

WORLD-WIDE PATENTED:

SEQUENTIAL FIRE / BUMP FIRE DEVICE

To ensure an easy and absolutely secure handling for our customers, the FASCO engineers developed the safest full sequential fire / bump fire (single shot / contact trip) actuation in the industry.
